

## CRADLE INSTALLATION

### LogTag® Interface Cradles

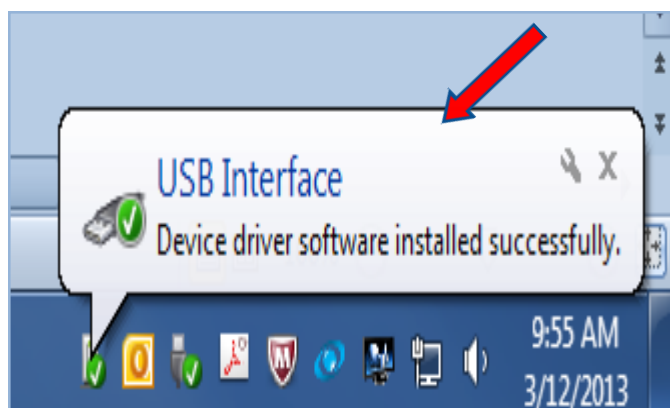

**Download the software before you plug in the cradle.** Data logger software is available online at

<http://logtagrecorders.com/software.php>

The data logger cradle is used to download information from the data logger onto the computer. The cradle can be left plugged in a computer that will be used to download information.

**Step 1–** Plug in the cradle into the available USB port on your computer.

**Step 2–** The computer will automatically detect the cradle and install the device driver software. Once complete it will display the message in the lower right corner of your monitor.
